

# Life in Class 3

## Year 2

### Summer Term

We have been very busy in Year 2 this term. We have thoroughly enjoyed reading and writing around our themed topics. We particularly enjoyed writing seaside poems.

We received an interesting letter from Mr Sharkface asking us to research facts about sea creatures and send our information to him at the sea life centre. We've had fun in the water tray creating different potions for Mr Sharkface and some of his friends.

We turned our role play area into an underwater sea cave and have had lots of fun in there!

Throughout this term we have continued to be maths detectives and learnt to measure in centimetres, metres, millilitres, litres, grams and kilograms.

In Science we have researched about animals and their habitats. We have also looked at plants and grown our own sunflowers. For our school trip we visited Washington Wildfow Trust. We had an excellent time and were involved in lots of different activities! We went pond dipping, we watched the otters been fed and even fed the birds.

We took part in an outdoor activity day and had lots of fun developing our co-ordination and teamwork skills. There were lots of activities for us to participate in and I think our favourite was definitely the water barrel challenge!

We have had a lovely, fun-filled, hardworking year! The children have worked hard and should be proud of their achievements.
