

Autumn In Class 4

Autumn has been a very busy time in class 4!

Science

In our science topic, Our Solar System, we found out about all of the planets (and dwarf planets!) in our solar system and researched many amazing things such as:

- The Sun, Earth and Moon
- How stars are formed
- Galaxies
- The phases of The Moon
- Nebulae
- Constellations

We linked our science topic with Art and created some attractive paintings of nebulae and planets.

In groups, we designed, created and painted spacecraft by reusing old household materials.

We also found out about how our body works and the functions of our internal organs.

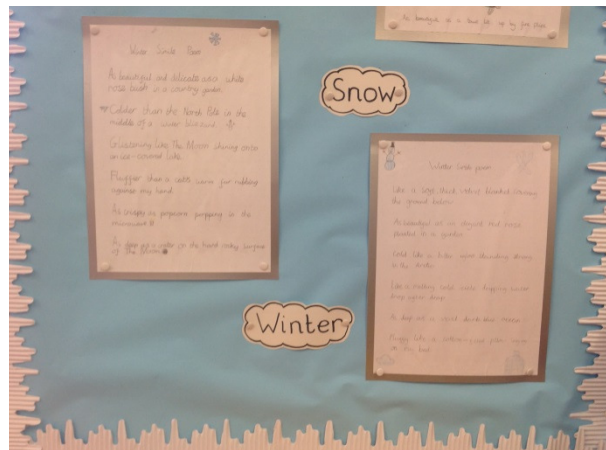

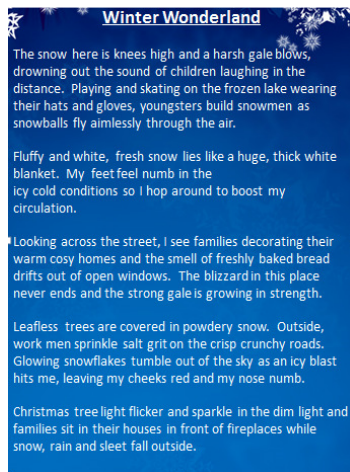

Jam Making

Our class picked some ripe raspberries from the school garden and we made some delicious jam which we sold to our parents. We had many positive reviews and were told that it was scrumptious! After the success of our raspberry jam, we branched out into other jam varieties which were just as yummy and popular.

Winter descriptions

Our class worked hard to improve our writing and we produced some excellent winter descriptions and poems.

We visited the Gala Theatre in Durham and watched Cinderella. It was a fantastic day out and we enjoyed every second of it.
